Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Proposed amendments were presented by the applicant. The examiner and applicant discussed the differences between the invention as embodied in the specification and the language of the claims. The examiner suggested further differentiating the enterprise content management system of the claims against the system described in Challenger to express the relationship to the web content manager. The examiner also suggested the applicant consider the wording of the authorization steps in claims 2 and 3 in order to better express it as defined in the specification as opposed to a broad interpretation such as mere log-in checks. Applicant stated an intention to further consider the specification and potential further definition of the claims. The examiner will consider formal arguments and/or amendments once filed.
